

OLUTIMILEHIN SEUN OWOSENI

timiowoseni@gmail.com | [Linkedin](#) | [Portfolio](#) | +2348122438217 | Abuja, Nigeria

PROFESSIONAL SUMMARY

Data Analyst with experience delivering business intelligence solutions across finance, healthcare, sales, and workforce analytics. Skilled in Power BI, Excel, SQL, and Python, with expertise in transforming complex datasets into dashboards, performance reports, and actionable business insights. Experienced in data cleaning, modelling, visualization, and stakeholder reporting to support data-driven decision-making.

TECHNICAL SKILLS

Business Intelligence: Power BI, DAX, Data Modelling, Interactive Dashboards, KPI Reporting

Data Preparation: Excel, Power Query, Data Cleaning, Data Validation, Data Transformation, ETL

Databases: SQL Server (SSMS), SQL, Joins, Subqueries, Aggregations

Programming: Python (Pandas, NumPy, Matplotlib)

PROFESSIONAL EXPERIENCE

Data Analyst · Vertex OLS · Abuja, Nigeria · 2025 – Present

- Built and maintained Power BI dashboards used to monitor forex and cryptocurrency trading performance, account profitability, and key risk metrics.
- Cleaned and reconciled daily trading datasets, identifying discrepancies before financial reporting.
- Analysed historical market and account performance data to identify trends influencing trading strategy and portfolio risk.

Data Analytics Consultant · Thinksville Consult · Nigeria · 2024

- Delivered a data analytics consulting engagement for Thinksville Consult, cleaning, transforming, and analyzing employment survey data collected from residents across Ekiti State using Excel and Power Query.
- Identified that over 60% of unemployed respondents held tertiary degrees, concentrated in the 25-34 age bracket, pointing to a skills-to-opportunity mismatch rather than an education gap.
- Developed an interactive Power BI dashboard segmenting respondents by age, gender, education, and sector preference, and presented analytical findings to the client.

Operations Supervisor · Regal Retreats · Ibadan, Nigeria · 2022 – 2023

- Produced daily and weekly reports on occupancy, staffing, and guest satisfaction metrics used by management for operational decisions.
- Standardized data flows across front desk, housekeeping, and guest services, improving cross-departmental reporting consistency.

Valuation officer/ Analyst · Demola Otitoola & Associates · Ibadan, Nigeria · 2020 – 2022

- Maintained property and client databases covering valuations, payments, and tenant records across an active real estate portfolio.
- Prepared structured valuation reports with financial and market analysis to support investment decisions and mortgage documentation.

ANALYTICS PORTFOLIO

Retail Sales Performance Analysis | Power BI · Power Query · DAX | [View Dashboard](#)

- Analyzed 240 transactions across 3 regions (North America, Europe, Asia) and 6 product categories to identify revenue drivers, seasonal trends, and customer payment behaviour.
- Created DAX measures for gross revenue, average order value, total transactions, and units sold; identified Electronics as the dominant revenue category and North America as the top region contributing nearly half of total revenue.
- Identified seasonal revenue trends that informed recommendations for targeted promotions during off-peak months.

Healthcare Accessibility & Resource Allocation Dashboard | Power BI | [View Dashboard](#)

- Analyzed healthcare facility data from 2,001 records across African communities to surface rural-urban disparities, funding allocation inefficiencies, and emergency response patterns.
- Engineered a custom urban/rural classification column using M code conditional logic in Power Query, and calculated Pearson correlation coefficient ($r = -0.032$) in DAX to evaluate the relationship between funding and emergency response times.
- Determined hospitals as the most cost-efficient facility type (\$16.35 per patient visit) while identifying significant urban–rural disparities in facility distribution, informing recommendations for equitable funding allocation.

Social Media Marketing Performance | Excel · Power Query · Power Pivot | [View Dashboard](#)

- Analyzed a full year of social media data for a consumer brand. 450 posts across 4 platforms (TikTok, Instagram, Facebook, Twitter) and 6 campaigns, generating 13.2M impressions and 870K engagements.
- Identified TikTok Video in the Afternoon as the highest-performing channel-format-time combination at 14.03% engagement rate, 2.4x the next best combination. Thus, enabling targeted budget reallocation recommendations.
- Built an interactive Excel dashboard using Power Query and Power Pivot, uncovering a critical follower conversion gap (0.11%), and delivering eight strategic recommendations to improve campaign performance.

EDUCATION

Professional Certificate in Data Analytics · Axia Africa · 2024

HND Estate Management (Distinction) Federal Polytechnic, Ado-Ekiti · 2018
